

A dramatic photograph of an industrial fire. A large, bright orange and yellow fireball dominates the left side of the frame. In the foreground, a dark-colored cylindrical tank is visible, with the letters 'VTG' printed on its side. To the right, a white fire hose is being used, with a stream of water directed towards the fire. In the background, there is a building with a corrugated metal roof and a street lamp. The overall scene is one of a major industrial accident.
